## Il compito

SFOFY sta per Opportunità di cibo di strada per i giovani.

Si tratta di un partenariato strategico Erasmus+ KA2 per la gioventù finanziato dall'Agenzia nazionale francese Erasmus+.

I partner del progetto sono:

le LABA (Francia)

Trade Management Services Ltd (Regno Unito)

kiezkuechen gmbh (Germania)

Momentum Marketing Services Limited (Irlanda)

Associazione VisMedNet (Malta)

Banbridge District Enterprises Ltd (Regno Unito)

Istituto europeo di e-learning (Danimarca)

Il progetto dura 24 mesi da febbraio 2018 a gennaio 2020.

Uno degli output del progetto di SFOFY è quello di generare una mappa interattiva / organica delle opportunità per gli imprenditori presenti o potenziali imprenditori nel cibo di strada. Le opportunità includono festival, finanziamenti e opportunità di formazione, reti e centri di incubazione. Include anche buone pratiche nel cibo di strada e nella promozione dell'attività.

## Google Maps

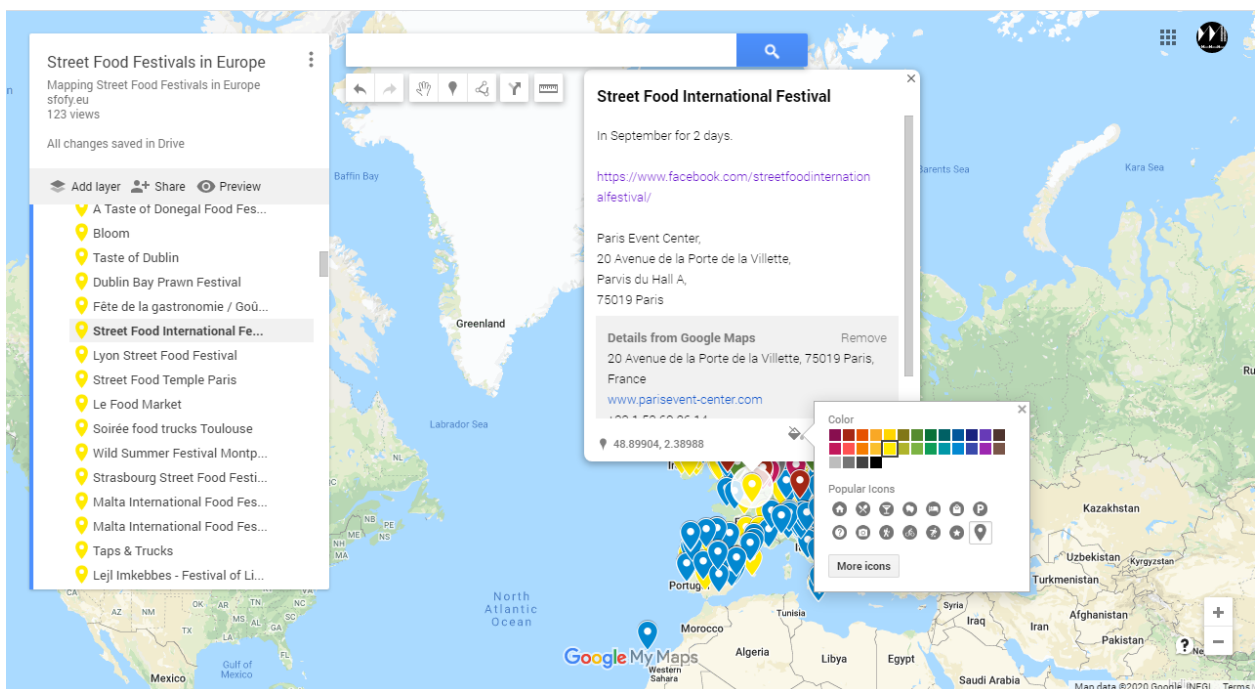

Abbiamo deciso di utilizzare Google Maps per l'attività di mappatura perché sapevamo che si possono aggiungere più luoghi e località contemporaneamente e che si può incorporare la mappa su una pagina web e anche su più pagine web senza bisogno di ulteriore amministrazione da parte del webmaster di tale pagina/e. Questo significa flessibilità, autonomia e cooperazione a distanza con facilità anche oltre la durata del progetto.

Per prima cosa è necessario avere un account gmail in modo da poter salvare le proprie mappe ecc. come verrà spiegato più avanti.

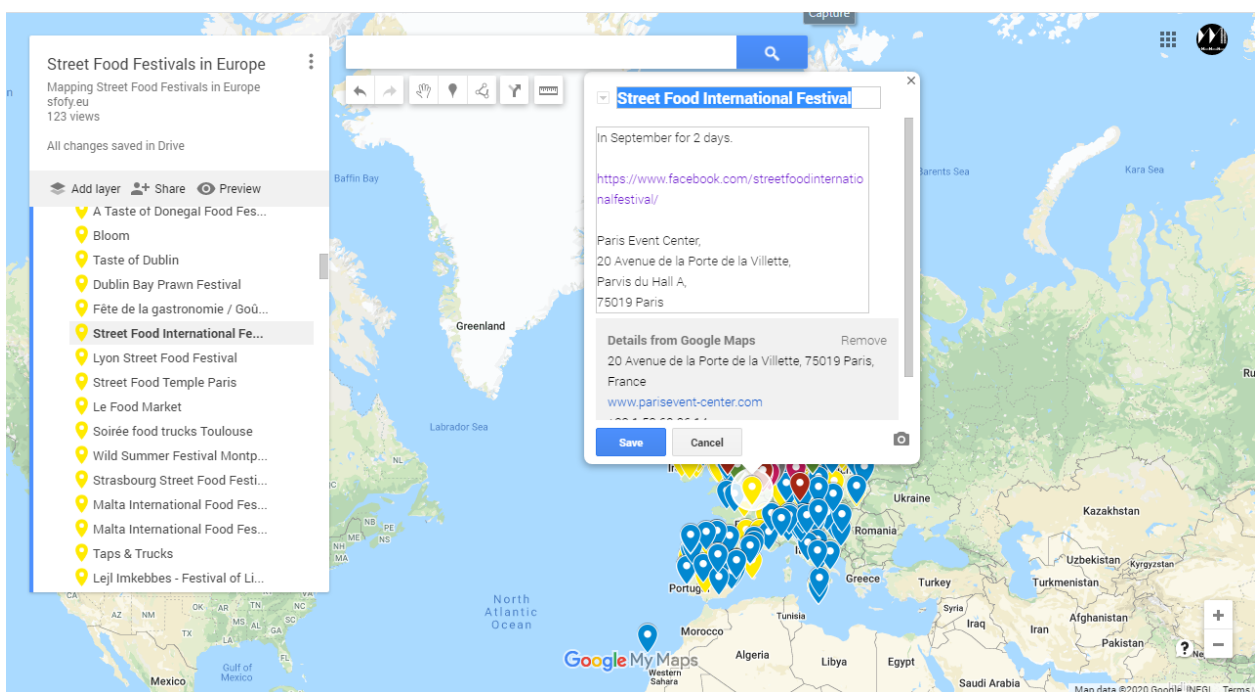

Si accede all'account gmail e si apre Google Maps nel browser internet.

Si apre il menu di Google Maps e si vedono diverse opzioni nel menu a sinistra. Si clicca su "I tuoi posti" e si apre un nuovo menu. In questo menu si deve cliccare su "MAPS". In fondo al menu si può cliccare su "CREARE UNA MAPPA". In questo modo si aprirà una nuova pagina web nel browser.

Appare un nuovo menu e si può vedere "Untitled Layer" e si può cambiare il nome del livello con un nuovo nome. Ora si può iniziare a cercare l'indirizzo o il luogo, come si usa normalmente Google Maps. Si inserisce un indirizzo, poi si clicca su "Aggiungi alla mappa". Si vedranno diverse icone per "Stile", "Modifica", "Aggiungi immagine o video", "Indicazioni per arrivare qui" e "Cancella funzione". In "Stile" si può modificare il colore del punto segnato e anche l'icona. In "Modifica" si può modificare la descrizione. Ad esempio, se si desidera aggiungere un festival, si avrà probabilmente un indirizzo. Si digita l'indirizzo e si aggiunge alla mappa e se si clicca sull'icona si vede solo l'indirizzo. Poi si modifica e si digita il nome del festival invece dell'indirizzo come titolo di quella voce sulla mappa. Sotto il titolo si possono aggiungere ulteriori informazioni.

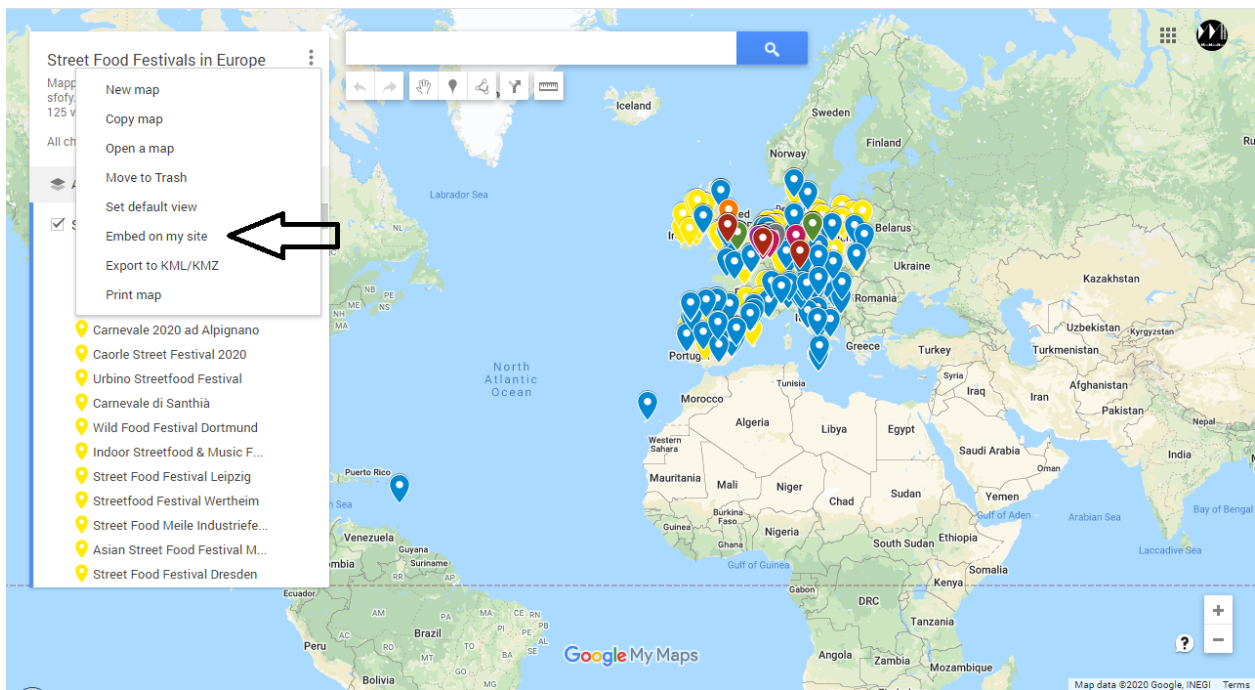

*Google Maps permette di cambiare il colore e l'icona del marcatore posizionato.*

*Si può cambiare il titolo e la descrizione dell'indirizzo scelto.*

Si può trovare il codice HTML da incorporare nel menu della barra degli strumenti sul lato sinistro. La mappa può essere incorporata in qualsiasi pagina web andando su "Condividi" e ottenendo il codice HTML di cui si ha bisogno per copiare e incollare il codice sorgente della pagina web.

Inoltre non si può incorporare, ma si può fare un link da qualsiasi pagina web o e-mail o documento pdf offline e quando si fa clic sul link il computer o il dispositivo mobile apre un browser internet con la mappa SFOFY.

Google Maps offre agli utenti la possibilità di inserire la mappa nei siti web.

## Mapping

Una volta che si è familiarizzati con Google Maps si deve pensare alla domanda "Quali informazioni metteremo sulla mappa?"

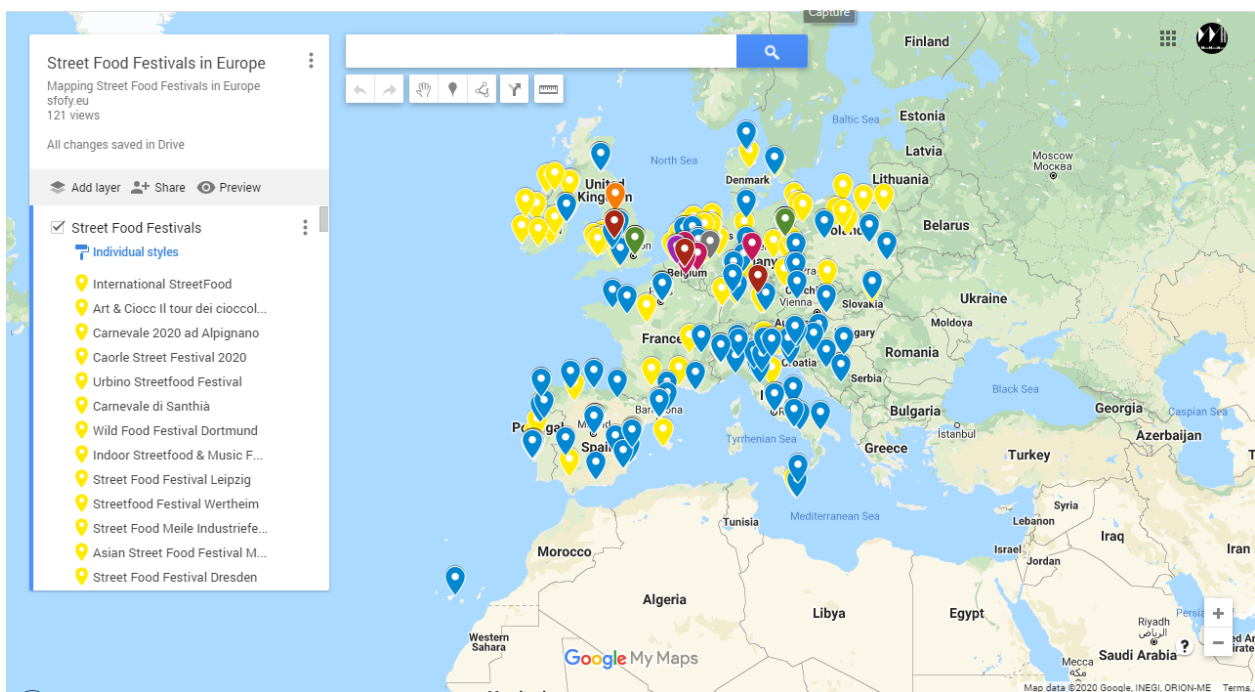

Dato che l'argomento è il cibo di strada, abbiamo voluto iniziare con i festival del cibo di strada in Europa. Abbiamo iniziato un foglio Excel con le colonne "Nome del festival", "Indirizzo", "Traffico approssimativo", "Periodo dell'anno", "Sito web" e "Durata".

Abbiamo iniziato con i paesi in cui abbiamo partner e quelli in cui si parlano le lingue del partenariato. Dopo aver trovato le informazioni di cui avevamo bisogno, abbiamo iniziato a cercare su Google Maps e abbiamo creato un livello. Abbiamo usato il giallo per i festival del cibo di strada, poiché volevamo avere un link al logo del progetto. Nella fase successiva abbiamo cambiato il titolo. Abbiamo usato il nome del festival invece dell'indirizzo. Abbiamo messo tutte le altre informazioni nella descrizione qui sotto.

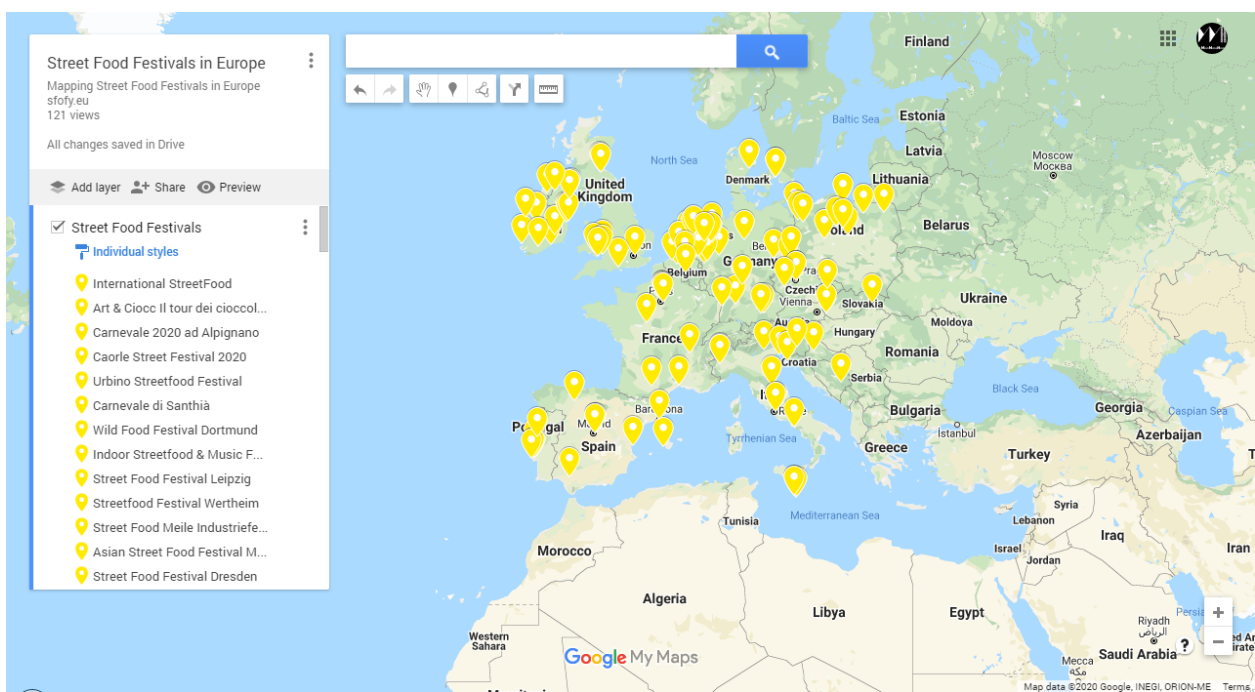

Nella seconda fase della mappatura abbiamo cercato informazioni su "Buone Pratiche", "Opportunità di finanziamento", "Reti alimentari", "Incubatori alimentari", "Formazione alimentare e ristorazione" e "Rete alimentare di strada". Abbiamo usato lo stesso sistema che abbiamo usato per i festival. Abbiamo iniziato con l'elenco dei paesi partner e di quelli di cui siamo in grado di parlare le lingue.

Durante questa fase abbiamo avuto l'idea di poter aggiungere "Opportunità di formazione". L'idea è venuta da quando conosciamo il progetto "Erasmus per giovani imprenditori (EYE)". Così abbiamo aggiunto le organizzazioni intermedie di ogni paese sulla mappa in un livello diverso. Abbiamo scelto il blu come collegamento all'Unione Europea.

Dopo questo passo, abbiamo iniziato ad aggiungere "Formazione e formazione per la ristorazione" in arancione, "Buone pratiche" in grigio, "Opportunità di finanziamento" in rosa scuro, "Reti alimentari" in viola, "Incubatori alimentari" in verde e "Reti alimentari di strada" in bordeaux. Abbiamo scelto diversi colori e strati per classificare i diversi soggetti in modo da trovarli più facilmente sulla mappa.

Questa è la mappa creata con tutte le informazioni.

Questa è la mappa in cui sono mostrati solo i festival del cibo di strada in Europa. Si può filtrare questa mappa in base ai criteri richiesti che sono già stati inseriti, ad esempio le buone pratiche, le opportunità di finanziamento, ecc.

I partner e le altre persone o organizzazioni che si occupano di cibo da strada hanno la possibilità di aggiungere altre voci nella mappa compilando il modulo <https://forms.gle/e7j9Kk3JJ7H6i2gZ9> e noi aggiorneremo la mappa di conseguenza controllando periodicamente se ci sono nuove voci utilizzando il modulo.

Il contenuto è stato generato durante la durata del progetto come segue, ma le voci sulla mappa continueranno ad essere raccolte anche oltre la durata del progetto.

## Le Sfide

Naturalmente abbiamo avuto alcune sfide linguistiche in paesi con lingue che non siamo in grado di parlare. Abbiamo utilizzato l'opzione di traduzione del browser.

Un'altra sfida era che non riuscivamo a trovare subito gli indirizzi e dovevamo fare una ricerca dettagliata. A volte si trattava di casi semplici come mettere uno spazio, aggiungere o togliere una virgola o non trovare il numero dell'edificio.

Abbiamo superato alcune di queste sfide chiedendo il loro contributo ai partner e, poiché tutti conoscono il loro campo nel loro territorio, sono stati in grado di aiutarci ad aggiungere le voci alla mappa. Possono ancora farlo anche dopo la fine della vita del progetto finanziato.

## Cooperazione estesa

Abbiamo cercato di mantenere la mappa il più comprensibile possibile con quante più informazioni possibili e anche che sia estendibile con ulteriori o nuove informazioni.

L'estensione è possibile per il progetto di SFOFY perché è possibile aggiungere più voci alla mappa man mano che si va avanti anche oltre la durata del progetto. Le voci possono essere suggerite dai visitatori del sito web del progetto, dove c'è un link ad un modulo che suggerisce più voci sulla mappa.

È anche una buona piattaforma per usare la mappa per promuovere il networking con strategie come "Elenca il tuo festival qui", in modo che il progetto possa essere visto come una buona piattaforma per il networking e la ricerca di opportunità. Questo processo è stato avviato nel corso della durata del progetto e sarà una delle strategie durante gli sforzi di sfruttamento.

## Potenziale dell'Emulazione del Processo

L'uso di tale mappatura è adatto per una serie di attività giovanili e per altre opportunità di formazione e di apprendimento o di cooperazione.

Si può avere un account gmail collegato a un progetto, ad esempio, e i partecipanti a un esercizio di cooperazione possono aggiungere voci a una mappa comune. Questo ha delle sfide dovute all'omogeneità delle voci, quindi ci devono essere delle linee guida solide da seguire o un editor centrale per correggere le voci. Questa cooperazione può essere implementata a distanza in modo molto semplice, poiché Google Maps è disponibile una volta che si è collegati a Internet.

È possibile in classe per progetti di ricerca comuni se i pin sulla mappa rappresentano i risultati.

Esempi di utilizzo di Google Maps per la mappatura sono:

- spilli su una Google Map per rintracciare la posizione di una tartaruga marina che ha un sensore con GPS attaccato al suo guscio,
- per mostrare la posizione dei camion per le donazioni di sangue,
- spilli su una mappa per mostrare la posizione dei furgoni utilizzati dalle banche per estendere i loro servizi a villaggi remoti dove non hanno filiali e
- per mostrare la posizione dei chioschi informativi mobili.

Alcune mappe possono essere statiche e con aggiornamenti periodici e altre possono cambiare il contenuto in modo dinamico se il contenuto necessita di ulteriori aggiornamenti.

Se utilizzato in un ambiente di apprendimento, questo lavoro cooperativo può essere parte di un piano di lezioni per promuovere la cooperazione e una certa autonomia, la responsabilità di gruppo e l'apprendimento flessibile. Può essere usato per promuovere la leadership nel caso in cui uno o più membri di un gruppo sia redattore o stabilisca le regole per il distacco. Può essere parte di una formazione più ampia o più ampia come in:

- ricerca o ricerca congiunta,
- strategie dei social media,
- creazione di reti e costruzione di comunità,
- strategie di marketing e
- progetti relativi a cultura / educazione / cibo / campagne.
